a : Feb 15th On this day a terrific S storm with furious SW gale raged all day at Pole Cottage; R gauge was snowed up in a few mins; when dug out on 16th the bottom of the funnel was found to be all hollow the drift having swept over the top & formed a crust across funnel which when melted only yielded .35. As I measured .77 in Stretton & Dr Barnett 1.15 I think I may at least conclude that 1.40 fell and have entered it as such

Compare diff of Pole Cott & Stretton on 13th
1.35" .34"

R. P. D.

The snow measurements in Feb may be not quite right; it is very difficult to obtain correct measurements at a height of 1600 ft as owing to high winds the snow even on cloudless days blows off the ground like dust Probably ∴ into the gauge; on one brilliant sunny day in Feb every hill crest was like a volcano; a white cloud of powdery snow blowing off it into the clear blue sky. R. P. D.
